SMART PURCHASE MODULE — SIMPLE USER SOP

ZEETA ELECTRICAL ENGINEERING PVT. LTD.

Document Version: 3.0 (Production Master Release)

Effective Date: October 2026

Target Audience: Purchase Managers, Procurement Executives, Store Incharges, Department Heads (HODs), and System Administrators.

---

1. EXECUTIVE INTRODUCTION & PURPOSE

1.1 Enterprise Overview

The **Smart Purchase Module** is the core procurement management solution for **Zeeta Electrical Engineering Pvt. Ltd.** It manages the complete material lifecycle—from initial floor requisitions and commercial indents to Purchase Orders (PO), Goods Receipt Notes (GRN), store inventory updates, and live Google Sheets ERP integration.

1.2 User Roles & Responsibilities

Department Heads (HODs): Initiate and approve material requisitions for production and maintenance.

Purchase Managers & Officers: Review approved indents, create formal POs, negotiate rates, and track vendor delivery timelines.

Store Incharges: Inspect incoming material at the factory gate, log physical GRNs, and credit inventory stock.

System Administrators: Manage user access, configure roles, and monitor ERP data synchronization.

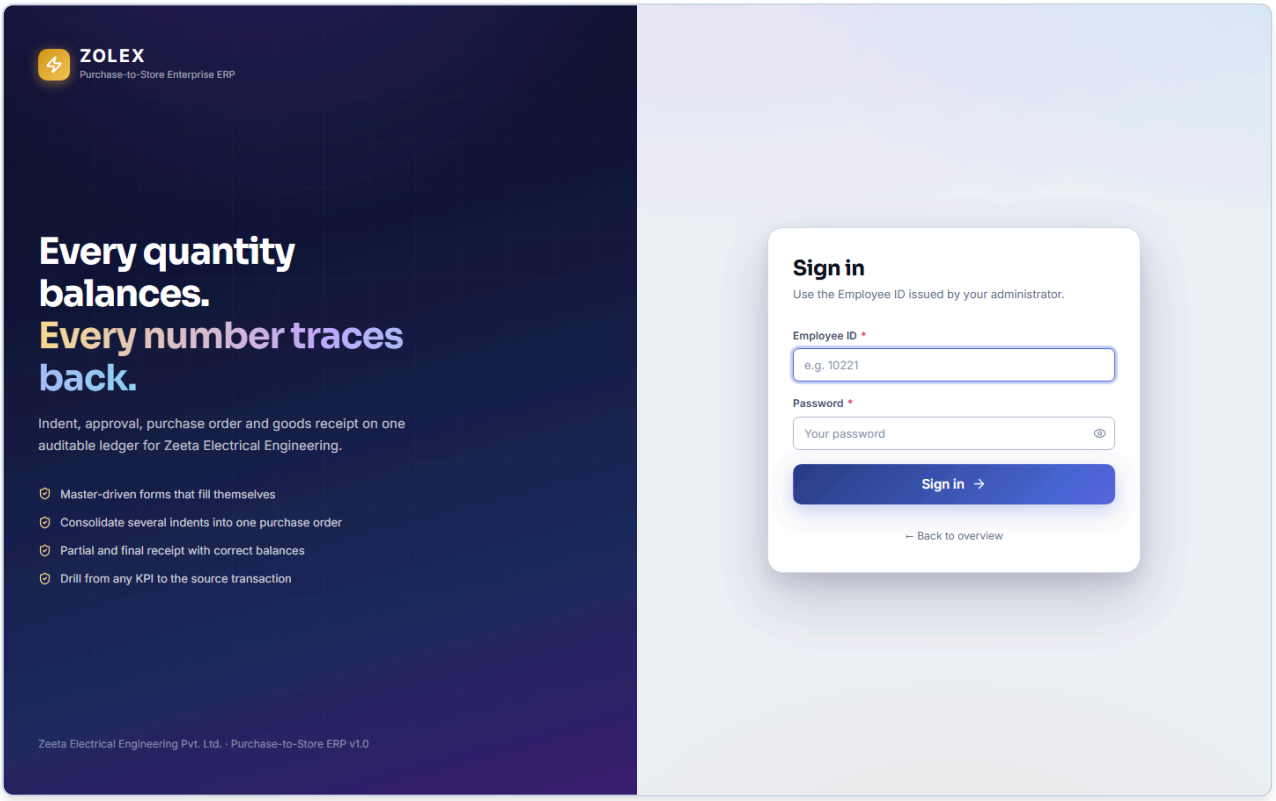

---

2. LOGIN & DIRECT AUTHENTICATION

2.1 Opening the Application

Access the Smart Purchase Module via any modern web browser at:

`http://172.16.18.22:8080/` (Production IP) or `http://localhost:8080/` (Workstation URL).

Login Screen

2.2 Direct Login Procedure

1. **[Callout ①] Employee ID:** Type your 5-digit Employee ID (e.g., `10221` for Admin, `20101` for Purchase Head).

2. **[Callout ②] Password:** Enter your secure password assigned by System Administration.

3. **[Callout ③] Sign In Button:** Click **Sign In** to log in.

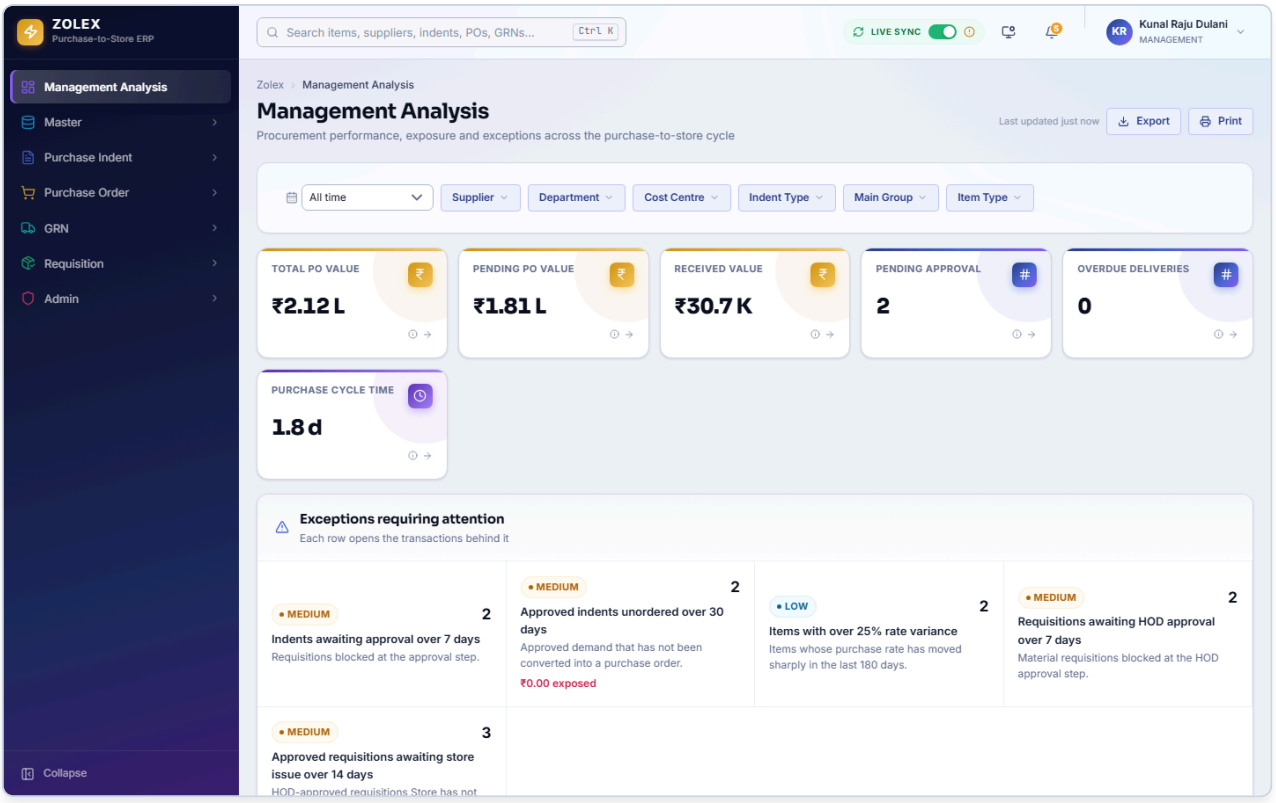

> **Operational Standard:**

> Authentication connects users **directly** to the Purchase Dashboard. There is **NO mandatory password change screen**.

---

3. PURCHASE MODULE DASHBOARD

After sign-in, users land directly on the **Purchase Overview Dashboard**.

Purchase Dashboard

3.1 Dashboard Layout & Metrics

[Callout ①] Total Requisitions: Active material requests awaiting review.

[Callout ②] Active Indents: Approved indents ready for PO creation.

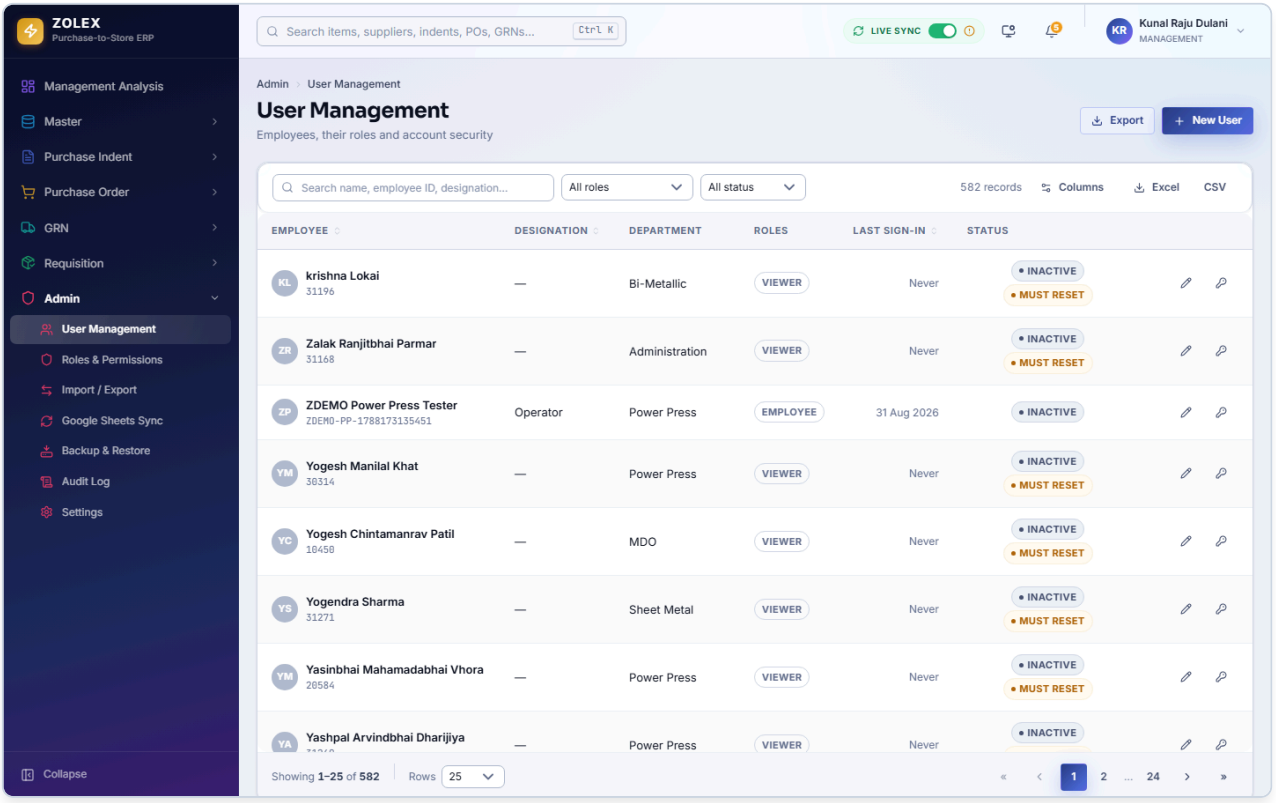

[Callout ③] Pending Orders: POs dispatched to suppliers awaiting delivery.

[Callout ④] Completed GRNs: Goods received into stock for the current period.

[Callout ⑤] Navigation Shell: Sidebar menu for switching between module sections.

4. USER ADMINISTRATION & MANAGEMENT

System Administrators can add new employees and assign roles directly without forced first-login password changes.

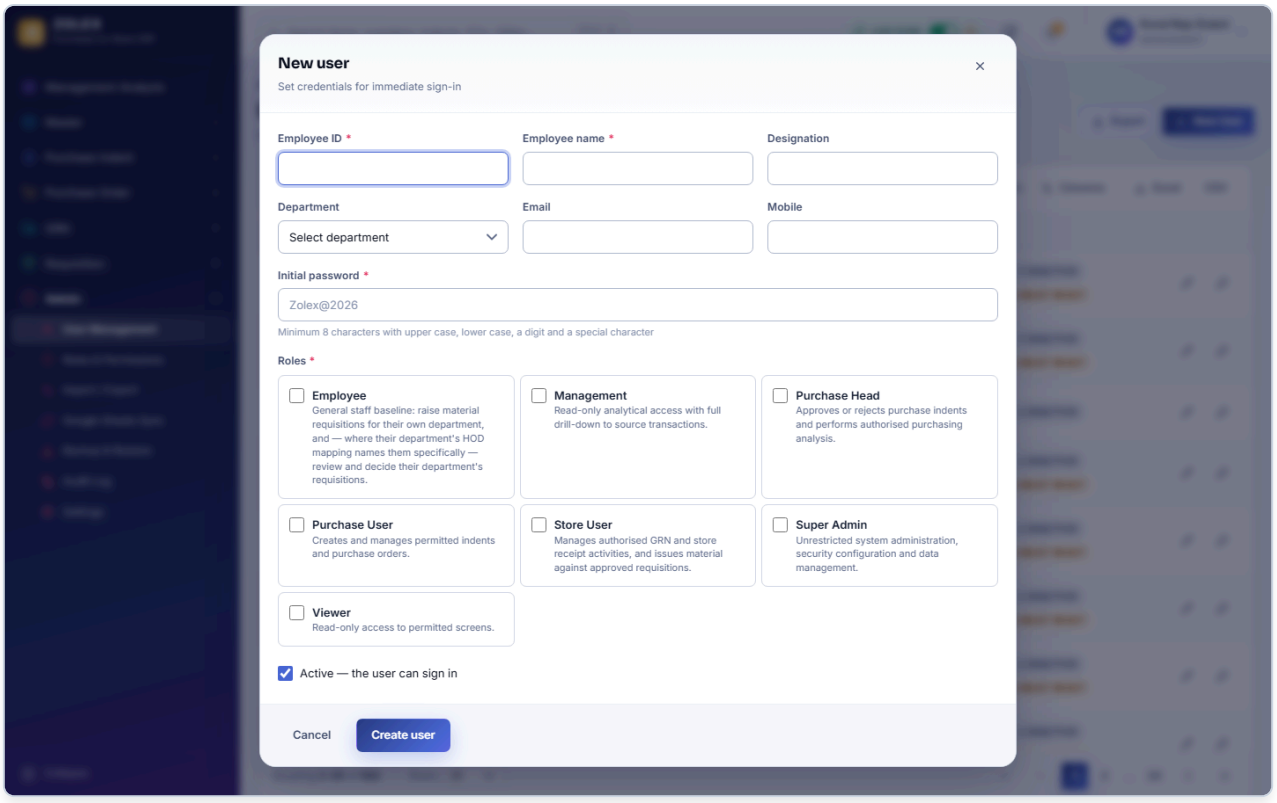

User Management List

4.1 Creating a New User

1. Open **Admin** > **Users** from the left navigation menu.

2. Click **+ New User** `[Callout ①]`.

Create User Modal

3. Fill out the mandatory fields:

* **[Callout ①] Employee ID:** Unique numeric ID (e.g., `test_purchase_user`).

* **[Callout ②] Employee Name:** Full employee name.

* **[Callout ③] Designation:** Job title (e.g., `Purchase Officer`).

* **[Callout ④] Password:** Initial login credentials.

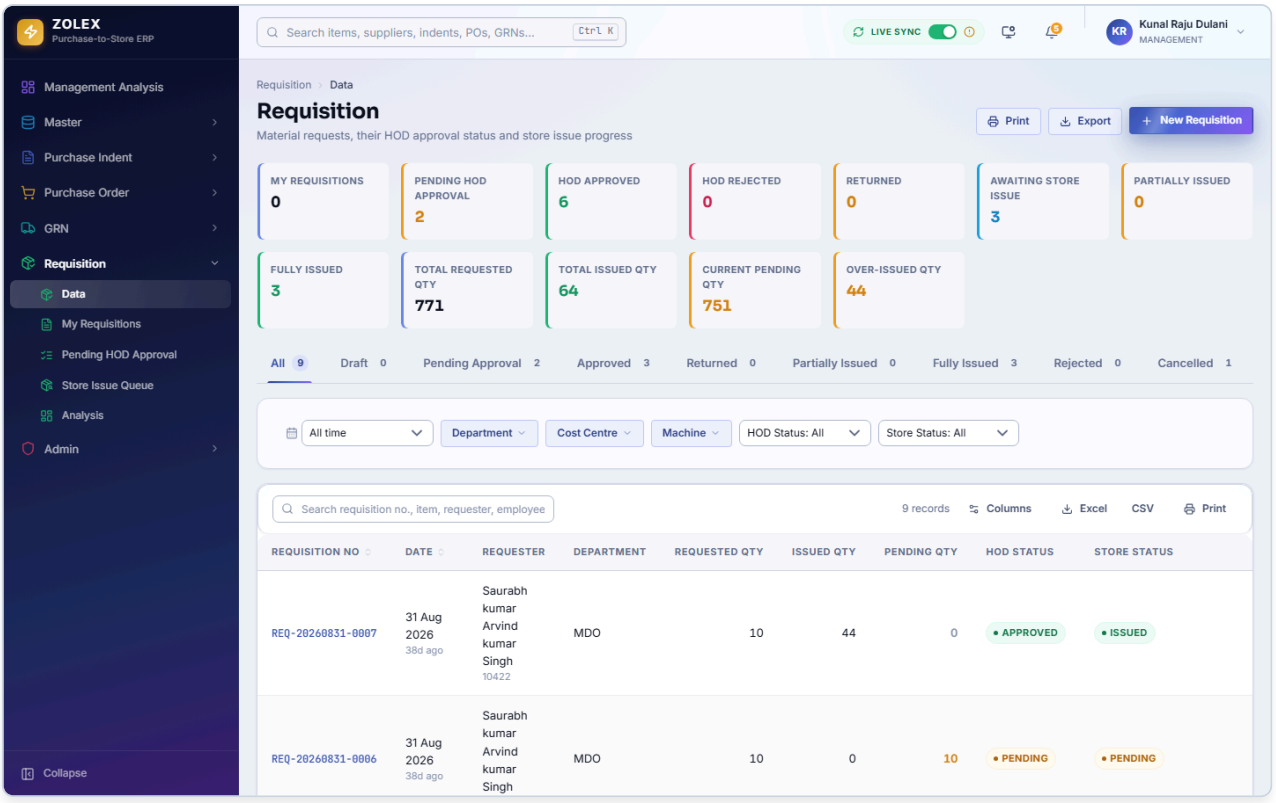

* **[Callout ⑤] Role Assignment:** Select appropriate roles (`Purchase Officer`, `Purchase Head`).

4. Click **Create user** `[Callout ⑥]`. The account is saved and ready for direct sign-in.

---

5. PURCHASE REQUISITION WORKFLOW

Material requests originate as **Purchase Requisitions** created by floor operators or HODs.

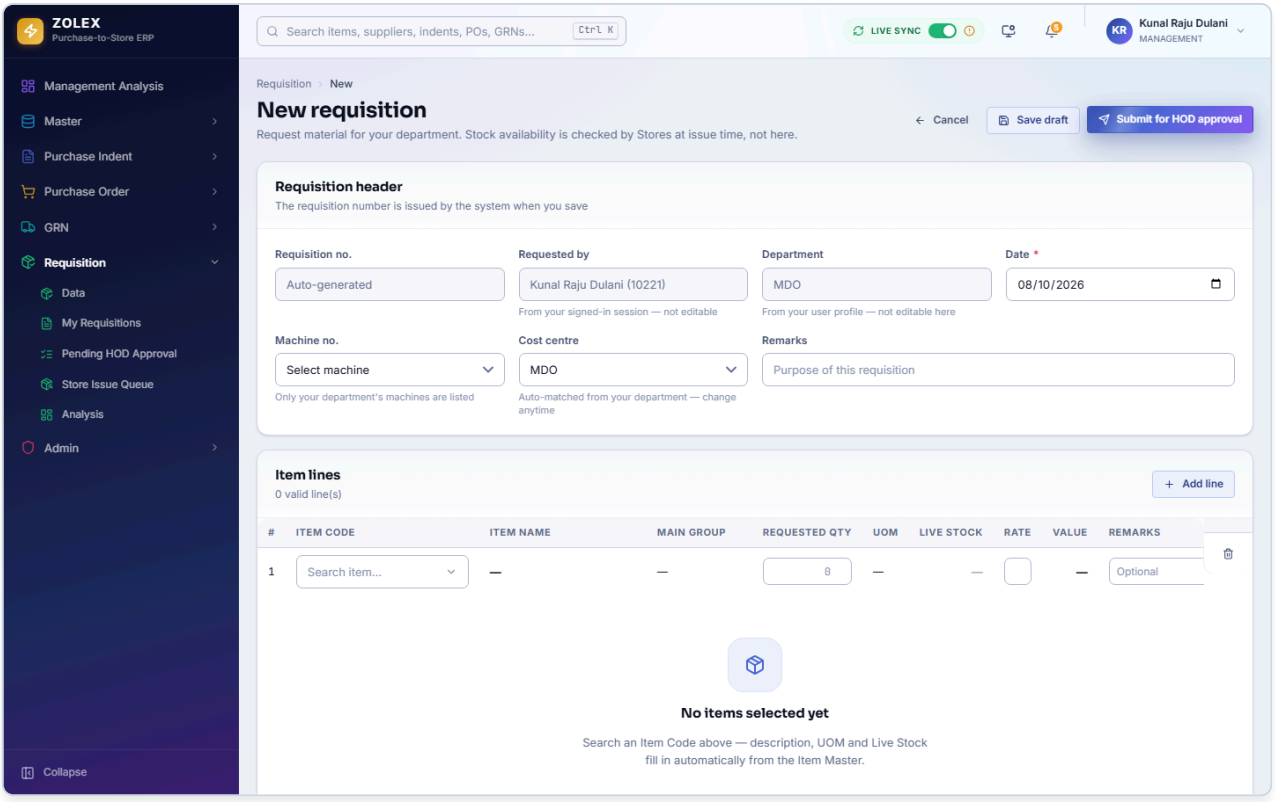

Purchase Requisitions Register

5.1 Creating a Requisition

1. Click **Requisitions** on the sidebar.

2. Click **+ New Requisition** `[Callout ①]`.

Create Requisition Modal

3. Enter requirement details:

* **[Callout ①] Department:** Target shopfloor department (e.g., Fabrication, Assembly).

* **[Callout ②] Item Selection:** Choose catalog item code or description.

* **[Callout ③] Quantity & UOM:** Enter required quantity and unit (KGs, Pcs, Meters).

* **[Callout ④] Required Date:** Select target floor delivery date.

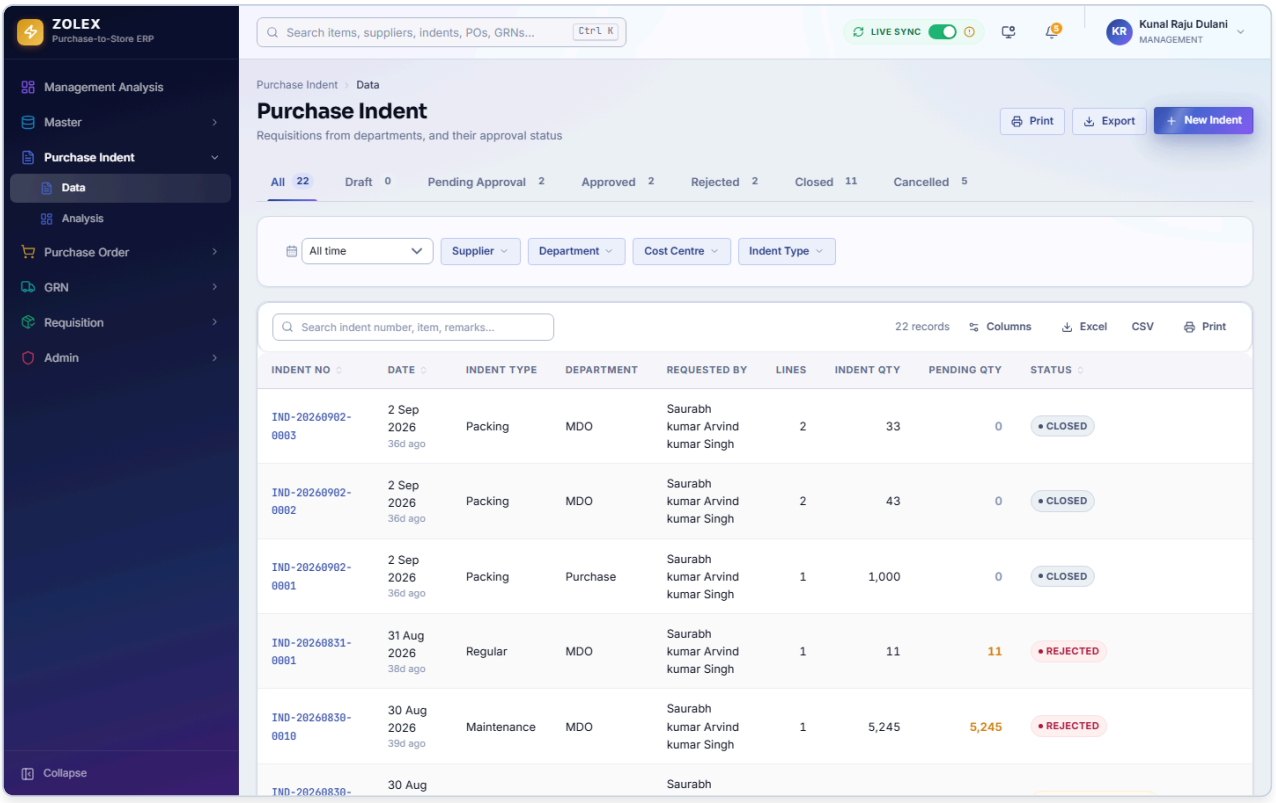

* **[Callout ⑤] Remarks:** Add technical specs or project tags.

4. Click **Submit Requisition** `[Callout ⑥]`. Status moves to **HOD Review**.

---

6. PURCHASE INDENT WORKFLOW

Approved requisitions are consolidated into commercial **Purchase Indents** for purchasing.

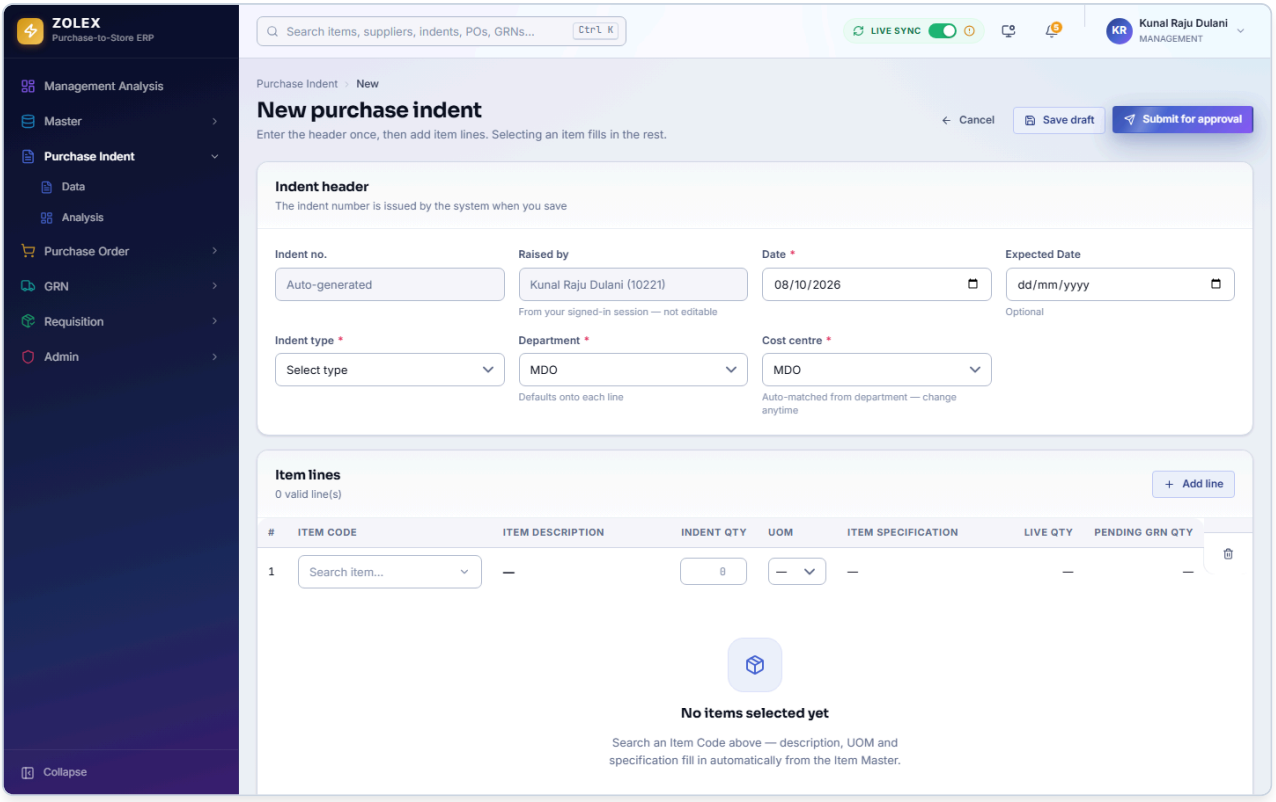

Purchase Indents Register

6.1 Raising an Indent

1. Click **Indents** on the navigation menu.

2. Click **+ New Indent** `[Callout ①]`.

Create Indent Modal

3. Fill out Indent details:

* **[Callout ①] Indent Category:** Raw Material, Standard Component, Tooling, or Consumable.

* **[Callout ②] Linked Requisition:** Select from pending approved requisitions.

* **[Callout ③] Verified Quantity:** Confirm technical specs and quantity.

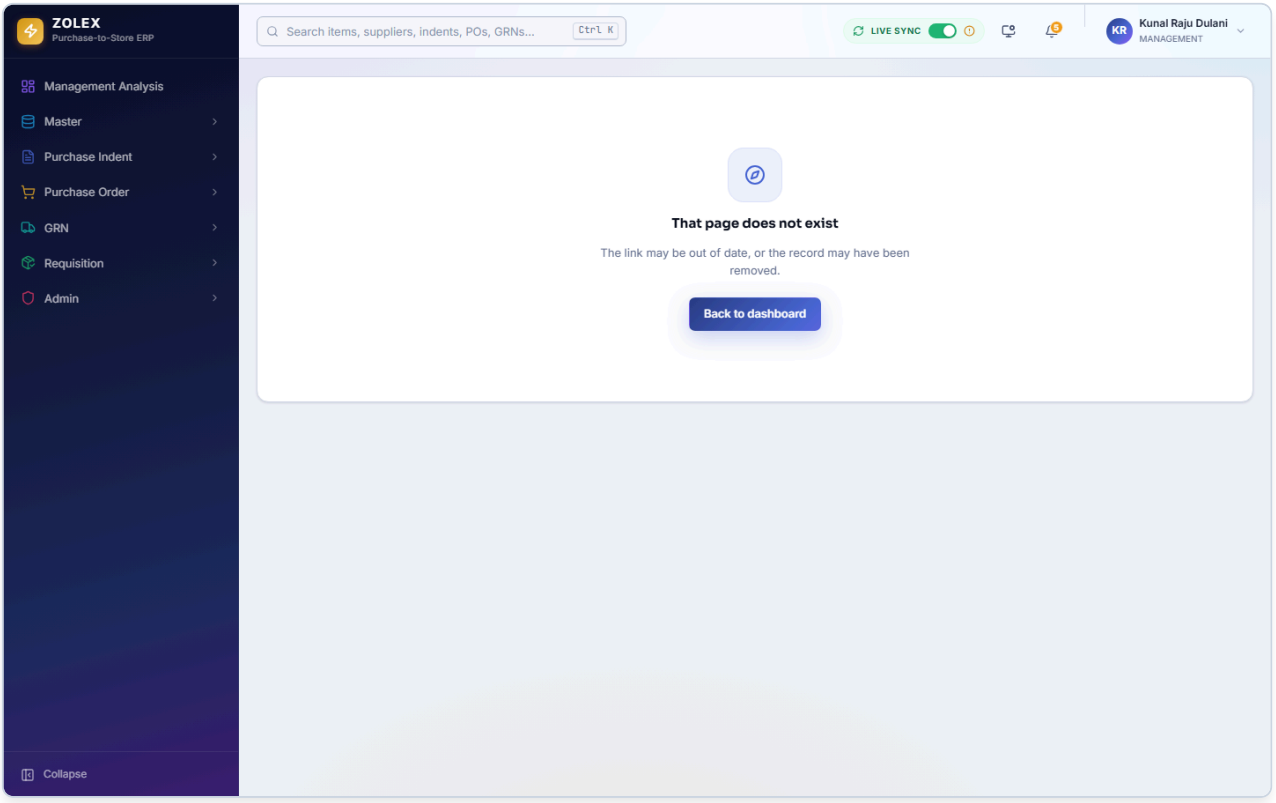

* **[Callout ④] Cost Centre:** Assign accounting project head.

4. Click **Save & Submit Indent** `[Callout ⑤]`.

---

7. PURCHASE ORDER (PO) WORKFLOW

A **Purchase Order (PO)** is issued to certified suppliers containing agreed rates, tax terms, and delivery schedules.

Purchase Orders Register

7.1 Generating a Purchase Order

1. Navigate to **Orders** on the sidebar.

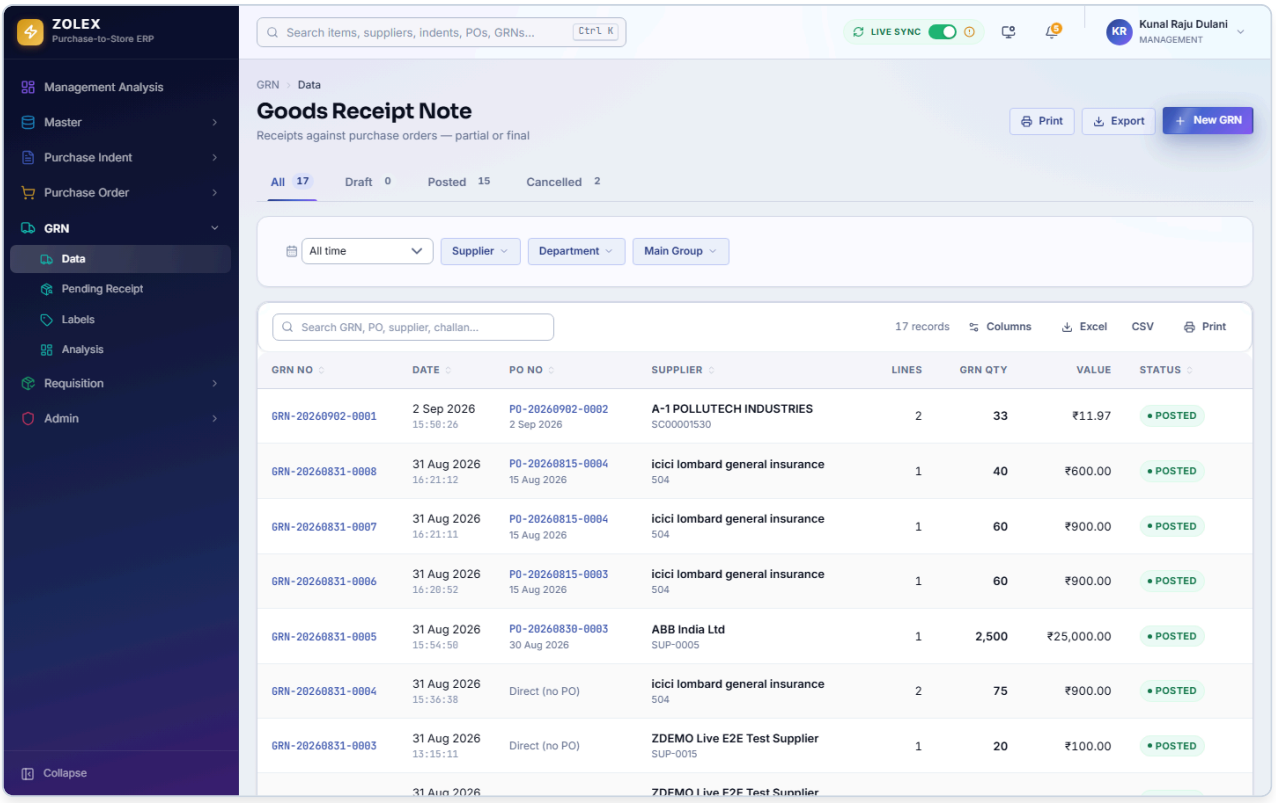

2. Click **+ New Order** `[Callout ①]`.

3. Select Supplier, link approved Indent, set Unit Rate, GST %, Payment Terms, and Delivery Date.

4. Click **Generate PO**. The PO is issued with a unique PO number (e.g., `PO-2026-0042`).

8. GOODS RECEIPT NOTE (GRN) WORKFLOW

When material arrives at the factory gate, the Store Incharge logs a **Goods Receipt Note (GRN)**.

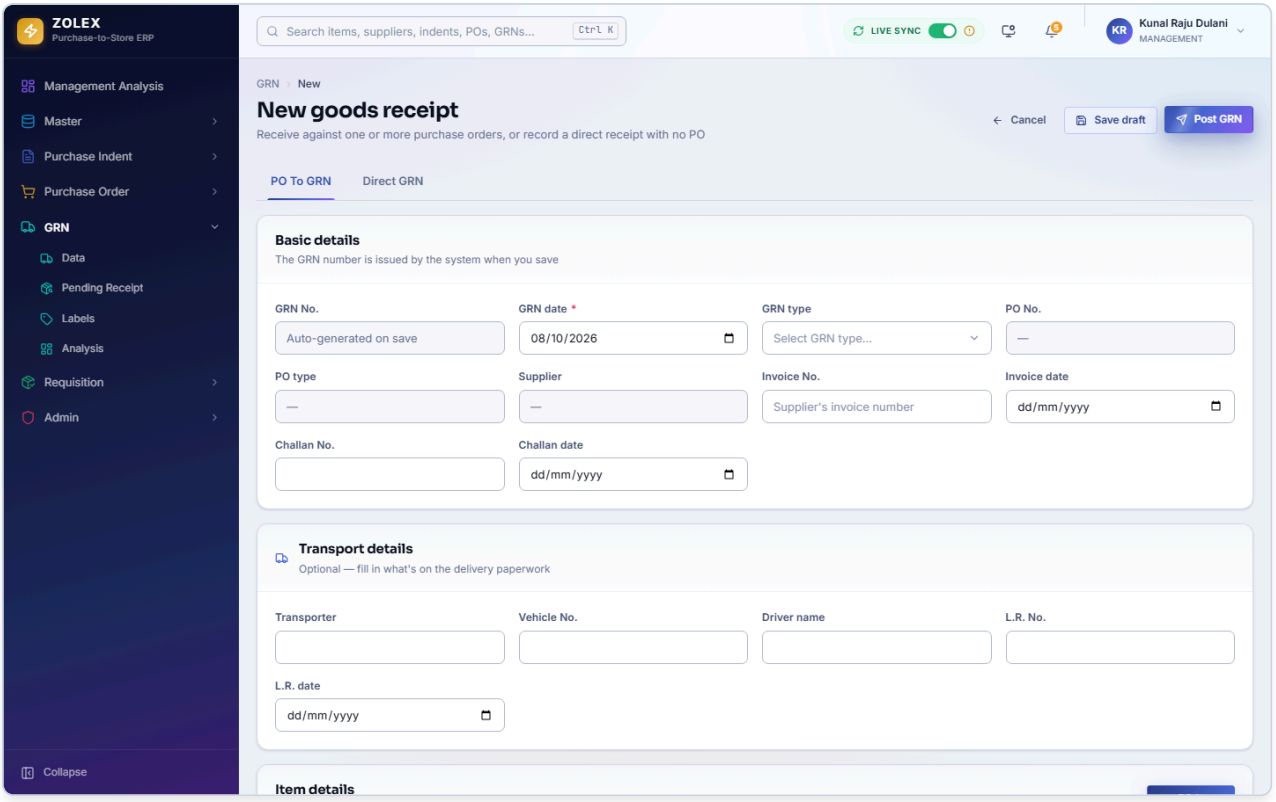

Goods Receipt Notes Register

8.1 Logging a Goods Receipt

1. Open **GRN** on the sidebar.

2. Click **+ New GRN** `[Callout ①]`.

Create GRN Modal

3. Complete receipt entry:

* **[Callout ①] Purchase Order:** Select matching active PO.

* **[Callout ②] Vendor Invoice No:** Log supplier invoice number and date.

* **[Callout ③] Logistics Details:** Enter transporter and vehicle registration.

* **[Callout ④] Received Quantity:** Record physically weighed / counted quantity.

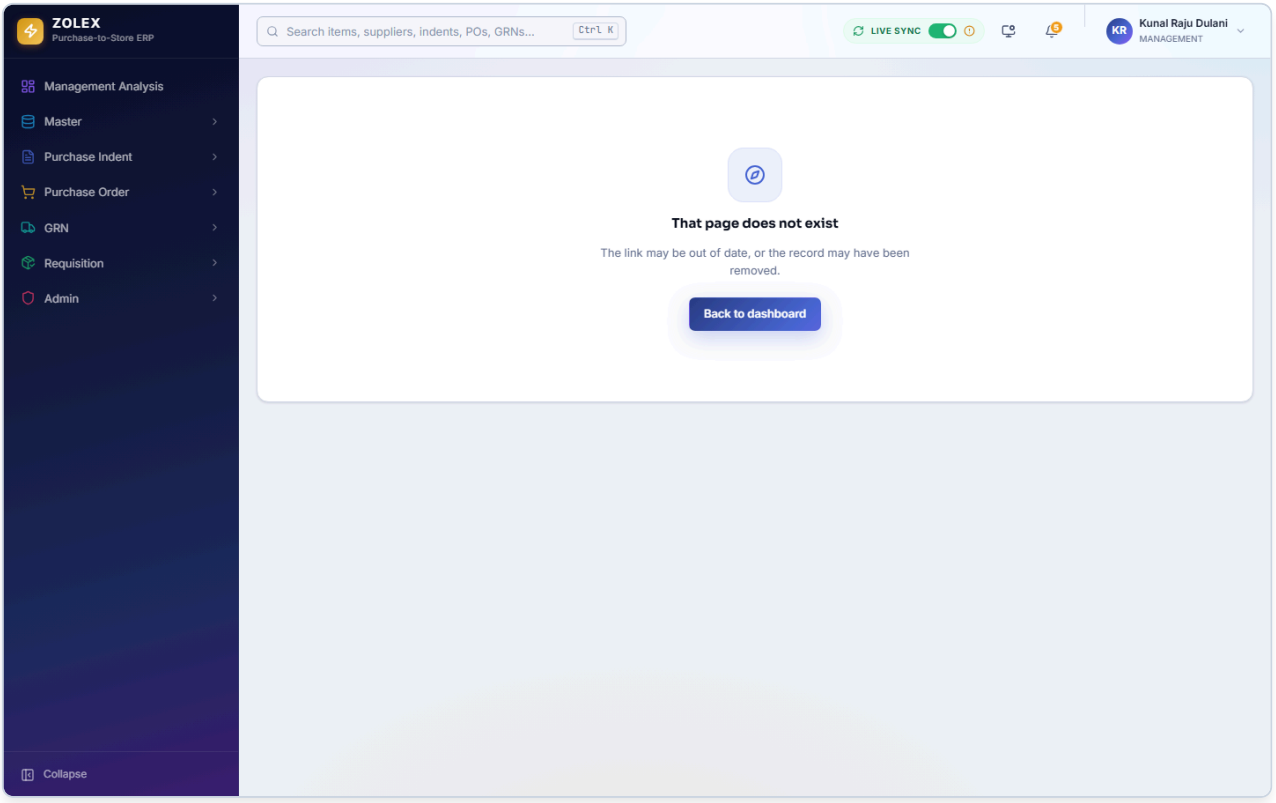

* **[Callout ⑤] Accepted vs Rejected:** Record passed items vs QC-rejected items.

4. Click **Submit GRN** `[Callout ⑥]`. Stock is automatically credited to inventory.

---

9. INVENTORY STOCK & ITEM MASTER

The **Items & Inventory** section provides real-time visibility into raw material stock and component balances.

Items & Store Stock

9.1 Store Features

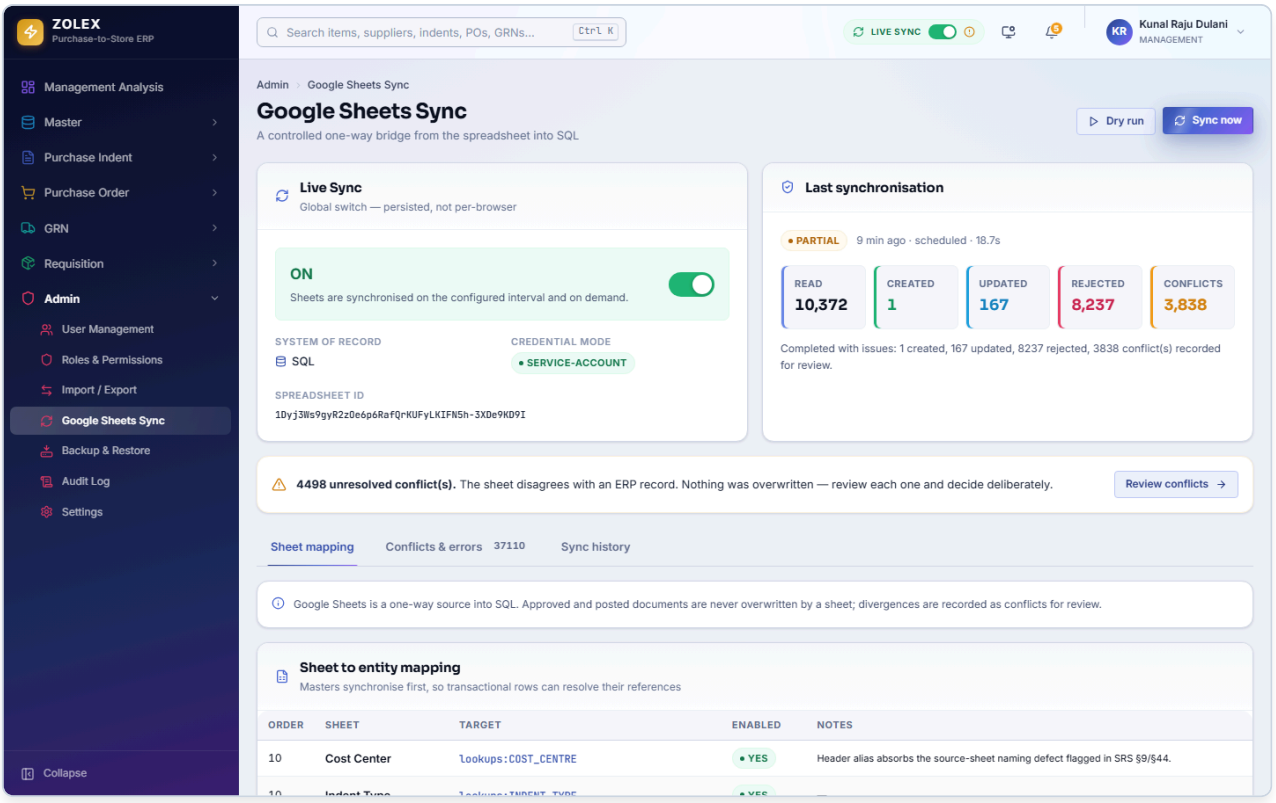

[Callout ①] Search & Filter: Search by CAT No, Zeeta Code, or Item Description.

[Callout ②] Stock Balance: Live physical quantity on hand.

[Callout ③] Reorder Point: Alerts for items below safety stock.

10. GOOGLE SHEETS ERP DATA SYNC

Bi-directional synchronization updates master Google Sheets ERP documents.

Google Sheets Sync Control Panel

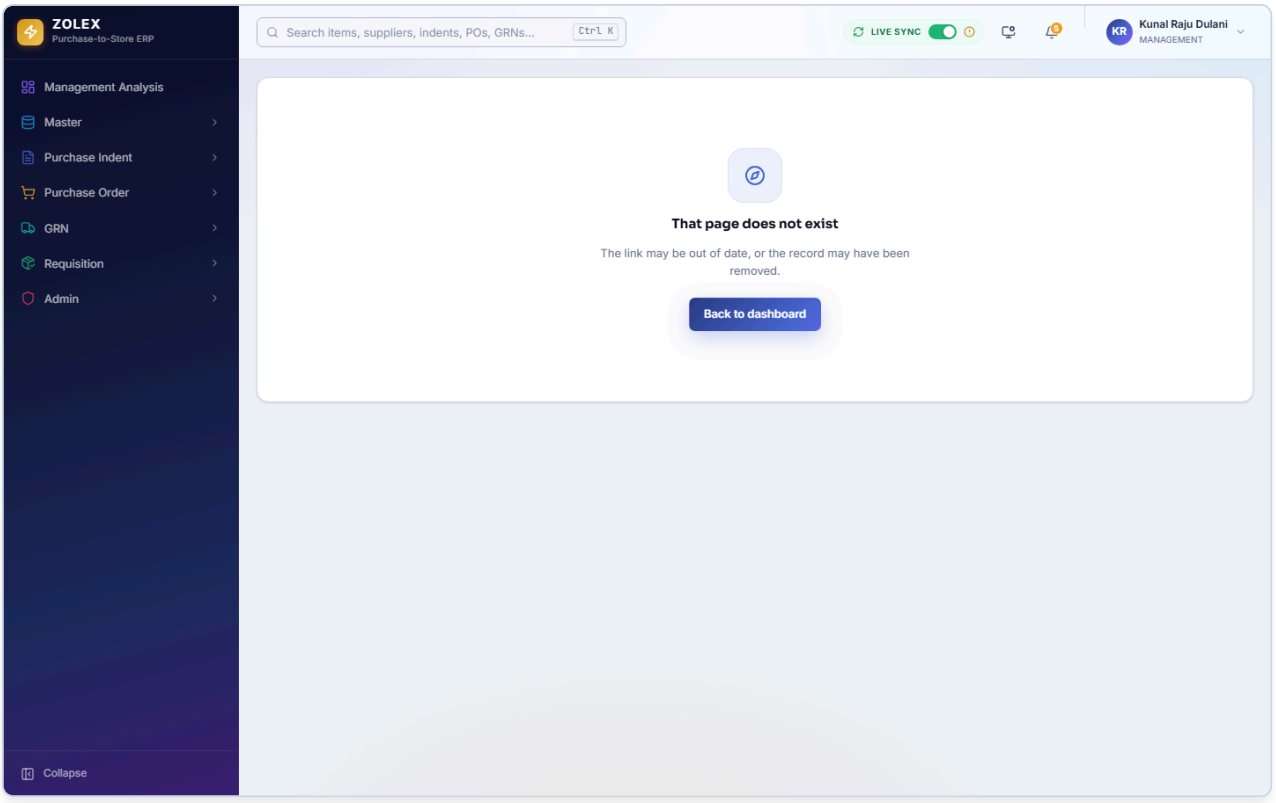

10.1 Running Data Sync

1. Open **Admin > Data Sync**.

2. Click **Sync Now** `[Callout ①]` to refresh master items, PO balances, and GRN receipts.

11. REPORTS & PURCHASE ANALYTICS

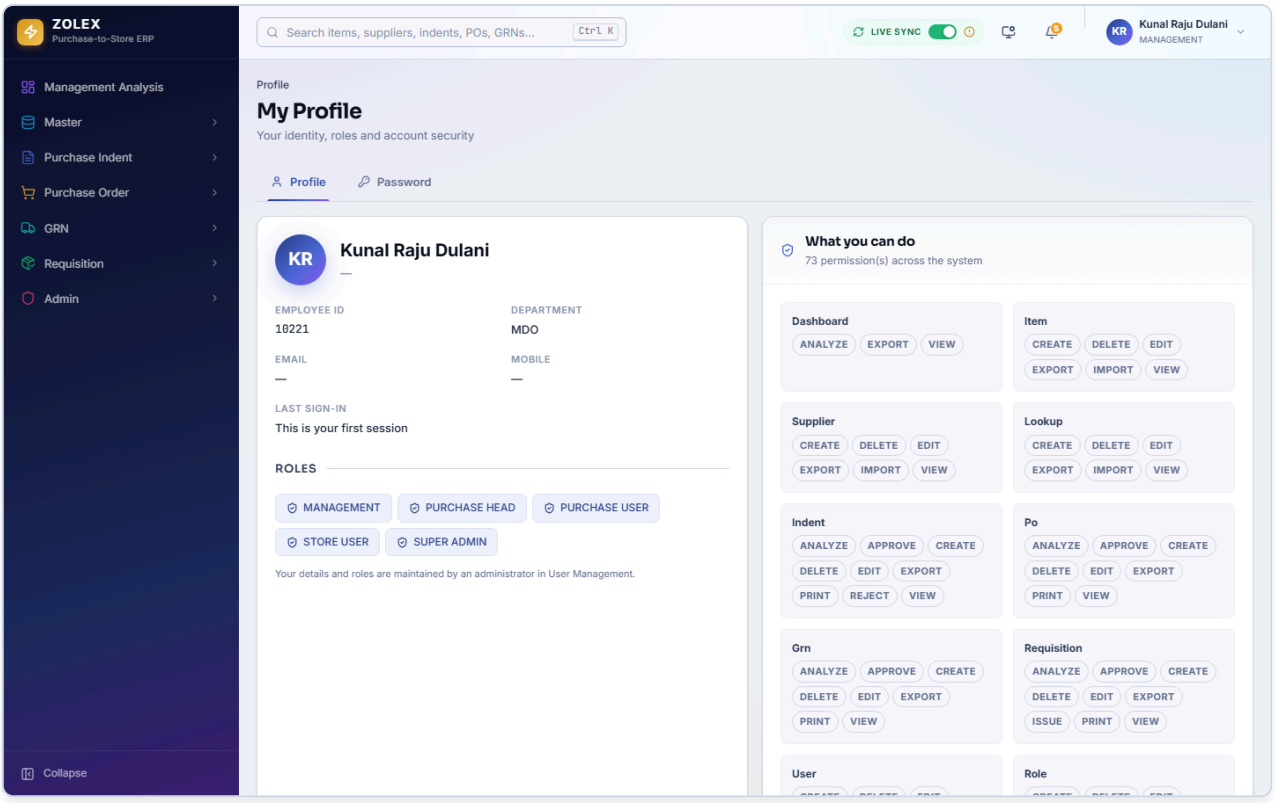

Analytics provide operational insights into vendor performance and spend.

Purchase Analytics Dashboard

12. USER PROFILE & VOLUNTARY PASSWORD CHANGE

Users can view profile details and update passwords voluntarily from settings.

User Profile Settings

13. COMPLETE VISUAL WORKFLOW DIAGRAM

14. EMPLOYEE TROUBLESHOOTING GUIDE

Issue / Error	Probable Cause	Action Required
Invalid Employee ID or password.	Credentials mistyped.	Re-verify credentials. Contact Admin for reset if needed.
Access Denied / Unauthorized	Missing role permissions.	Contact Administrator to assign required role.
GRN Quantity Exceeds PO Limit	Over-delivery by vendor.	Adjust GRN quantity or amend PO limit before submitting.
Google Sync Timeout	Temporary network disruption.	Click **Sync Now** again on the Data Sync panel.
